Certification and Course information

The course offered by K2 is named “Mastering Bots”.

It is an online, instructor led training, delivered over 4 hour sessions during 5 days, during evening hours.

It will give students a solid understanding of the Automation Anywhere platform,

besides preparing them to obtain the Advanced RPA Professional certification,

and also lay the foundations for the Master RPA Professional certification.

The cost of the certification voucher,

as well as guidance and orientation about the certification process will be provided as well.

What's included in the course?

- ❑ Architecture Overview
- ❑ Control room
- ❑ AAE Client: Recorders and Workbench commands
- ❑ Detailed assisted exercises based on real world scenarios :
 - Best Practices: Variable, Comments, Error handling
 - SQL and Databases
 - Web Services with XML and the REST API
 - PDF Integration
 - Email integration
 - Working with Excel
- ❑ Metabots and the Metabots Designer
- ❑ Certification Guidance
